Jiyeon Seo

Game Designer & Product Specialist

✉ siyremi@gmail.com | LinkedIn: https://www.linkedin.com/in/jiyeon-seo-84779a248 | Korean (Native) · English (Fluent)

Summary

Game designer and product specialist with 3.5 years of LiveOps experience on casual mobile games, including *Friends Town* and *Friends Popcorn*. Combines level and economy design with SQL and PowerBI analysis to improve conversion, retention and event performance. Bilingual in Korean and English, with experience leading cross-functional teams from concept to live service.

Professional Experience

Product Specialist - Metabora(King Studio), Pangyo, South Korea **Apr 2023 - Aug 2026**

- Led the end-to-end development of *Friends Town*, including themed content design, object interaction systems, and player progression.
- Increased featured package revenue by 300% month over month during the *Friends Popcorn* × *Crayon Shin-chan* collaboration through data analysis and player testing.
- Developed an automated difficulty-tuning system for 10,000+ stages with engineers, cutting weekly balancing work from 2.5 hours to 5 minutes.
- Refined the difficulty curve to create a more engaging gameplay experience while maintaining player retention.
- Optimized event progression by adjusting target level counts based on player data, increasing consecutive daily logins from 2 to 5 days.
- Analyzed gem earning and spending patterns to manage virtual currency inflows for new packages and IP collaborations, helping prevent in-game economy inflation.
- Designed and launched new gameplay mechanics and LiveOps events in collaboration with Art, Engineering and Animation teams, iterating based on player feedback.

Game Projects

The Witch's House - Project Lead & Game Designer Unreal Engine

- Led the team in designing levels, narrative, and difficulty progression for a 3D platformer.

Adventure Match! - Project Lead & Game Designer Unity Engine

- Designed core Match-3 mechanics, level progression, and exploration systems for a mobile game.
- Led cross-functional collaboration to coordinate game design, art production, and development milestones.

City Plogger & Covid Jump - Game Designer Unity Engine
Progress@Play Awards

- Designed a 3D endless runner inspired by plogging campaigns and a 2D platformer encouraging people to stay active and positive during the COVID-19 pandemic.
